CORPORATE PROFILE

PRODUCTS

Through our design, innovation, research & development, we cope with the constant change of consumer taste & styles for both our Europe and US customers. Every season, we gather fashion information from international exhibitions such as Premiere Vision, Kingpins Show, Bread & Butter, etc. In addition, GOLDEN WIN GROUP also has been participating in Kingpins Show as an exhibitor. With all our market knowledge and specialist, GOLDEN WIN GROUP manages to provide one-stop service spanning from design, product development, procurement, sourcing, to production of denim products with premium wash effects.

SHOWROOM

We have a fully equipped R&D centre for the provision of an integrated chain of services that stretches from design to manufacturing, finishing and final delivery.

We display our multi-seasonal fabric and wash collections in our 10,000 sq ft new showroom. This showroom enables our invaluable customers to review all collections in one stop.

WASH DEVELOPMENT CENTRE

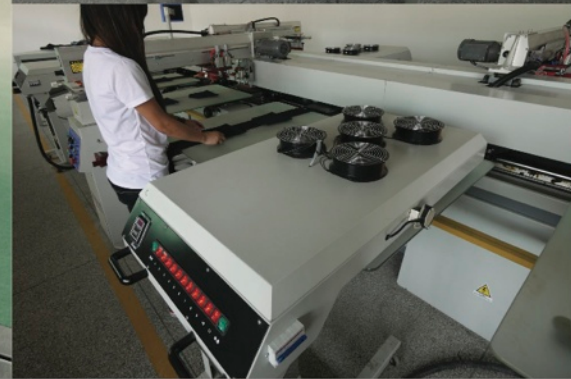

Our laundry laboratory is well equipped with advanced technological machineries. With our creative & experienced laundry specialists, we can develop and manufacture innovative & competitive denim products with premium wash effects.

SAMPLE DEVELOPMENT CENTRE

Our sample room is capable of producing 10,000 pieces of garments each month to cope with the dynamic and ever changing landscape in the apparel industry.

EMBROIDERY & PRINTING

We are capable of producing as well as designing products with high-value embellishments through our in-house printing & embroidery machineries.

Premium Laundry

the art of denim finishing

GOLDEN WIN GROUP operates its own new premium laundry facilities. The synergy blended American/ Japanese/ Chinese design cultures together and allow for multicultural interpretation of what premium denim were all about. With the advanced machineries & equipment from the US & Europe, our annual laundry capacity for premium wash have expanded to :

- Pants: 4 million pieces

SOCIAL RESPONSIBILITIES

Eco Sustainability

Golden Win Group maintains the highest standard of ethics and social responsibility involved in denim production.

We are committed to continuously looking for alternative treatments and re-invent processes to reduce environmental impacts.

At Golden Win, we believe that environmental protection is a part of our business strategy that is as important as anything else that matter. Advanced Technologies that are implemented in our Premier facilities in ZhuHai:

FRIENDLY PROCESS

IN-HOUSE WASTE WATER TREATMENT

- 70% of water consumption from re-cycled water

LOW CARBON EMISSION

- Extracted steam from nearby power plant instead of burning oil or coal
- Process/cycle saving chemical (Less time and temperature)
- Empowering steam re-cycling technology
- Eco friendly air cooling system

USE OF ENERGY /SAVING ECO-FRIENDLY MACHINERIES AND EQUIPMENT

- Ozone & Laser Machineries

GREEN PRODUCTS

- Denim re-cycling program
- Organic cotton development

People

We are able to gain the confidence and respect from major customers, in particular, customers in the US & Europe. Through our excellent records in compliance with social policies, such as the protection of human rights, labour union requirements and social health requirements.

We are committed to provide a pleasant & hygienic working & living environment to our people. We aim at enhancing the quality of life of our people through the provision of recreation facilities such as gardens, parks and sports amenities.
